

```
#include<iostream>

using namespace std;

int main(){

    int number,count=0;

    cout<<"Enter the Number: ";

    cin>>number;

    while(number!=0){

        number=number/10;

        count++;

    }

    cout<<"Digits in the Number are: "<<count;

    return 0;

}
```
